

Description

Thermo Roll Window Corporation designs and manufactures heavy-commercial and architectural aluminum windows and terrace doors for use in replacement and new construction projects. For over 25 years, Thermo Roll products have been enhancing the look, comfort and safety of some of New York City's most prominent buildings. Thermo Roll products are used by many notable general contractors and property management firms – their quality and design ensure a perfect installation every time.

Products

Thermo Roll aluminum windows are available with a variety of options as well as many accessories. The “tilt and turn” window is the flagship of Thermo Roll's product line – tilting in at the top to allow ventilation and turning or swinging in along a side pivot for easy cleaning. Other feature window products include casement, double-hung, and picture window lines. Sliding and swing patio and terrace doors are also available. Thermo Roll can customize its product features to accommodate any window project.

Design and Manufacturing

Thermo Roll product design is innovative and revolutionary. With several patents to its credit, Thermo Roll continues to lead the industry in product engineering for myriad applications. All Thermo Roll products are tested to meet or exceed stringent industry specifications.

Thermo Roll manufacturing is state-of-the-art. Proprietary computer software allows efficient project quotes and component tooling and ensures complete job tracking and superior product quality. Products are available in assembled and ready-to-assemble (“knock-down” or “KD”) format for shipping.

Benefits and Advantages

From its emphasis on quality to its exceptional service, Thermo Roll provides undeniable customer satisfaction. Thermo Roll advantages include fast turnaround on all standard and custom orders, available in-house engineering and installation support, and manufacturing efficiency resulting in significant cost savings for the customer.
